RN & PN Adjunct Faculty

Nursing Clinical & Lab

NEEDED FOR Spring 2027

North Central State College is seeking adjunct faculty to teach the following for Spring Semester 2027 (1/11/27).

Advanced Concepts of Practical Nursing I (PNUR 2012) This course builds on the basic nursing knowledge gained in PNUR1012 and PNUR1030. Emphasis is placed upon content relating to interferences with meeting basic human needs of safety and protection, nutrition and elimination, sensory perception, and oxygenation throughout the life cycle. Focus will be upon utilization of the nursing process. Content includes presentation and study of drug categories that are related to common health problems. The role of the practical nurse in drug administration is emphasized. Principles of therapeutic nutrition are integrated throughout the course. Practical application of this information is achieved through clinical experience at in-patient facilities and various community health venues. • Associate's degree in nursing; BSN degree preferred • 2 years' experience in medical-surgical nursing • An Ohio or Multi State unencumbered RN license	Clinical Sites Available: UH Samaritan – Ashland • Wednesdays (6:30-5:30 pm) • 1/13, 1/20, 1/27, 2/3, 2/10, 2/17, 2/24 (3/3 makeup date if needed)

Advanced Concepts of Practical Nursing II (PNUR 2032) This course is a continuation of content begun in PNUR1012, PNUR1030, and PNUR2012. Content is designed to prepare a student to care for individuals of all ages. Emphasis is placed upon content relating to interferences with meeting basic human needs of safety and protection, nutrition and elimination, sexuality, and oxygenation throughout the life cycle. Focus will be upon utilization of the nursing process. Content includes presentation and study of drug categories that are related to common health problems. The role of the practical nurse in drug administration is emphasized. Principles of therapeutic nutrition are integrated. Patient care experiences include local nursing homes and the obstetrics and gynecology unit in a local hospital. There is a capstone preceptorship experience at the end of the semester. Evening hours may occur during the clinical rotation. • Associate's degree in nursing; BSN degree preferred • 2 years' experience in medical-surgical nursing • An Ohio or Multi State unencumbered RN license	Clinical Sites Available: UH Samaritan – Ashland OhioHealth Mansfield – B21 • Wednesdays (6:30-7:30 pm) • 3/17, 3/24, 3/31, 4/7, 4/14, 4/21, 4/28, 5/5

Health Alterations LAB (RNUR 1052) This course will continue the application of nursing care concepts, critical thinking, clinical judgment, and decision making in care of the adult client. Students will build upon foundational knowledge established in previous coursework. Emphasis is placed on the exploration of chronic health conditions and understanding of the nursing process. Students will apply the roles and responsibilities of the developing nurse, collaborating with the healthcare team to plan evidence-based care using the nursing process. Focus is placed on basic human needs, restoration of wellness therapeutic communication, health maintenance, promotion. Clinical rotations integrate emerging medical-surgical knowledge into the promotion of safe, client-centered care. Qualified applicants shall have: • BSN degree • 2 years' experience in medical-surgical nursing • An Ohio or Multi State unencumbered RN license	Labs Available Section 04 • Tuesdays • 12:30 – 4:20 PM • 1/12, 1/19/ 1/26, 2/2, 2/9, 2/16, 2/23 Section 06 • Wednesdays • 2:00 – 5:50 PM • 1/13, 1/20, 1/27, 2/3, 2/10, 2/17, 2/24

Health Alterations I (RNUR 1052) This course will continue the application of nursing care concepts, critical thinking, clinical judgment, and decision making in care of the adult client. Students will build upon foundational knowledge established in previous coursework. Emphasis is placed on the exploration of chronic health conditions and understanding of the nursing process. Students will apply the roles and responsibilities of the developing nurse, collaborating with the healthcare team to plan evidence-based care using the nursing process. Focus is placed on basic human needs, restoration of wellness therapeutic communication, health maintenance, promotion. Clinical rotations integrate emerging medical-surgical knowledge into the promotion of safe, client-centered care. Qualified applicants shall have: • BSN degree • 2 years' experience in medical-surgical nursing • An Ohio or Multi State unencumbered RN license	Clinical Sites Available: Avita Galion (Thursday) Avita Ontario (Thursday) Fisher Titus - Norwalk (Thursday &/or Friday) OhioHealth Mansfield Med Surg 1 (Thursday) OhioHealth Mansfield Stepdown (Friday) UH Samaritan – Ashland (Friday) • 6:30-2:30 pm • Thursdays: 1/14, 1/21, 1/28, 2/4, 2/11, 2/18 • Fridays: 1/15, 1/22, 1/29, 2/5, 2/12, 2/19

Health Alterations II (RNUR 1054) This course will expand upon knowledge obtained in previous coursework. Continued focus will be placed on nursing care concepts, critical thinking, clinical judgment, and decision-making in care of the adult client. The exploration of chronic health conditions and understanding of the nursing process are emphasized. Students will apply the roles and responsibilities of the developing nurse, collaborating with the healthcare team to plan evidence-based care using the nursing process. Concentration is placed on basic human needs, restoration of wellness, therapeutic communication, health maintenance, and promotion. Clinical rotations integrate emerging medical-surgical knowledge into the promotion of safe, client-centered care. Qualified applicants shall have: • BSN degree • 2 years' experience in medical-surgical nursing • An Ohio or Multi State unencumbered RN license	Clinical Sites Available: Avita Galion (Thursday) Avita Ontario (Thursday) Fisher Titus - Norwalk (Thursday &/or Friday) OhioHealth Mansfield Med Surg 1 (Thursday) OhioHealth Mansfield Stepdown (Friday) UH Samaritan – Ashland (Friday) • 6:30-2:30 pm • Thursdays: 3/18, 3/25, 4/1, 4/8, 4/15, 4/22, 4/29 • Fridays: 3/19, 3/26, 4/2, 4/9, 4/16, 4/23, 4/30

Obstetric & Reproductive Care (RNUR 2032) This course focuses on the basic needs of maternal and neonatal clients. Nursing care concepts of therapeutic communication, clinical judgment, and clinical decision-making are emphasized throughout the course. Students will discuss the roles and responsibilities of the obstetric nurse in providing quality, safe, client-centered care for diverse populations through teamwork and collaboration. Foundations of the nursing process are demonstrated in the management of maternal and neonatal clients in the acute care setting. Qualified applicants shall have: • BSN degree • 2 years' experience in OB nursing required • An Ohio or Multi State unencumbered RN license	Clinical Sites Available: OB Clinical OhioHealth – Mansfield • Tuesdays • 6:30-4:30 pm • 1/19, 1/26, 2/2, 2/9, 2/16, 2/23 (Session A) • 3/23, 3/30, 4/6, 4/13, 4/20, 4/27 (Session B)

Pediatric Care LAB (RNUR 2034) This course addresses the needs of the pediatric population. Focus is placed on health promotion, health assessment, holistic wellness, maintenance of health, and recognition of illness for children from infancy to adolescence. Students will incorporate essential concepts of critical thinking, therapeutic communication, collaboration, prioritization, and clinical judgment into the nursing care of children. Students will analyze family dynamics and community resources impacting the pediatric population. Evidence-based practice standards and atraumatic care are integrated as alterations in physiological, developmental, and genetic factors are explored in this population Qualified applicants shall have: • BSN degree • 2 years' experience in pediatric nursing preferred; emergency department experience accepted • Simulation experience preferred • An Ohio or Multi State unencumbered RN license	Labs Available Thursday (Session A) • 8:00 – 11:50 AM (Section 01A) • 12:30 – 4:20 PM (Section 02A) • 1/14, 1/21, 1/28, 2/4, 2/11, 2/18, 2/25 Thursday (Session B) • 8:00 – 11:50 AM (Section 01B) • 12:30 – 4:20 PM (Section 02B) • 3/18, 3/25, 4/1, 4/8, 4/15, 4/22, 4/29

Complex Health Alterations I (RNUR 2052) This course is a continuation of prior medical surgical nursing courses and is a companion to Complex Health Alterations II. Evidence-based practice serves as the foundation for safe, client-centered care of clients experiencing various complex physiological disorders. Psychological and psychosocial effects associated with various disorders are also analyzed. Critical thinking, prioritization, and delegation are emphasized as students evaluate roles and responsibilities of the developing nurse and collaborate within the healthcare team. Clinical judgement and professional communication are incorporated as the student synthesizes a plan of care for clients experiencing both actual and potential health alteration Qualified applicants shall have: • BSN degree • 2 years' experience in medical-surgical nursing • An Ohio or Multi State unencumbered RN license	Clinical Sites Available: OhioHealth Mansfield Stepdown • Tuesdays • 6:45-2:45 pm • 1/12, 1/19, 1/26, 2/2, 2/9, 2/16, 2/23
