

3357:13-13-341 Life Experience Credit Procedure

- (A) In some curricular areas it is the policy of the College to recognize competencies acquired through life/work experience. In order to qualify, interested persons must apply for Life Experience Credit. Contact your Department Chair or Divisional Dean to determine if this is available in your degree major.

- (B) A student must translate life and/or work experience into competencies, match competencies with what is specified in the course outcomes, and display these materials in a "portfolio." Students applying for Life Experience Credit must have five full years of relevant experience.

- (C) Portfolios are evaluated by faculty and/or external reviewers with expertise in the field using the checklist found in 13-342 Life Experience Checklist for Students.

Effective: June 15, 2010
