

**ADMISSION WITH ADVANCED STANDING PROCEDURE
ASSOCIATE DEGREE NURSING/REGISTERED NURSING
2022**

How do I apply with Advanced Standing to the Associate Degree Nursing program?

The following policies and procedures apply to students requesting admission to the Associate Degree Nursing (ADN) program with advanced standing. "Advanced Standing" indicates that the student has satisfactorily completed, or has been given credit for at least one or more of the clinical nursing courses at North Central State College. This student can be a transfer student, or a returning North Central State College student previously enrolled in a clinical course in the nursing program, including students who have had one dismissal from the program for academic reasons.

Returning and transfer students must meet the following criteria established by the Nursing Department:

1. Achieve an accumulative GPA of 2.5 or better

All students must have an accumulative GPA of no less than 2.5 to be considered for acceptance to the program with advanced standing. Students who do not meet this requirement may take general education elective courses to raise their GPA.

2. Passing ATI TEAS Score

Students must meet the minimum requirement of a 65% for the ATI TEAS test.

3. Most recent nursing course was completed within the past three years

Students whose latest nursing course was taken three years or more prior to reentry are not eligible for readmission with advanced standing.

4. Complete the Health Sciences Re-entry Form

Ten (10) weeks before the beginning of entry to the program, the student should complete the Health Sciences Re-entry Form. This form is available from the Health Sciences Office.

Once the student's file has been evaluated, he or she will be notified by the Nursing Department of the results of this evaluation.

5. Obtain 10 points on the Criteria for Advanced Standing

Accumulation of a satisfactory number of points (10 or more) of the attached Criteria for Advanced Standing to the ADN Program determines the student's eligibility for the HESI, dosage calculation and technical skills testing.

Each applicant who has obtained 10 points or more will be evaluated by the Program Director. Based upon individual evaluation, one of the following may be decided:

- a. Readmission into the program
- b. Conditional readmission into the program with specific stipulations as outlined by the faculty
- c. Denial of readmission

The Program Director and nursing faculty will evaluate individual cases and may, for cause, deny readmission on an individual basis.

6. Complete the Dosage Calculation Test

The Department of Nursing will contact the student to make arrangements for a dosage calculation test and a technical skills test (below) after the student has satisfactorily obtained 10 points as stated above. One (1) attempt will be allowed. The Nursing Department will notify the student of satisfactory or unsatisfactory completion of the criteria for admission with advanced standing.

7. Complete the Technical Skills Test

Students must successfully demonstrate six technical skills. Performance will be evaluated using the criteria identified in the North Central State College critical skills checklist. Students will be given a list of critical skills and six skills will be chosen from the list. One (1) attempt will be allowed.

8. Complete the HESI Exam (if applicable)

When applying for RNUR 2030, RNUR 2050, or RNUR 2070, the student must obtain a score of 850 on the Intermediate HESI exam. The cost of the exam is approximately \$75.00, to be paid by the student prior to testing. The test may only be attempted one (1) time.

Returning Students

Students who have interrupted the clinical course sequence with a failing grade (grade of less than 77% in a clinical nursing course, or by not taking a clinical nursing course during any one semester, must apply for admission with advanced standing to the ADN nursing program.

Transfer Students

Transfer students must submit an official transcript of previously completed college courses for evaluation. Contact the Student Records Office to begin the process. Descriptions of previously completed courses may be required. Deadline dates in the college catalog for transcript evaluations must be observed.

Important Additional Requirements!

- ☞ Students will be required to maintain a current CPR certification for Health Care Provider throughout the nursing program.
- ☞ An acceptable health physical along with verification of required vaccinations will be required while in the Associate Degree Nursing program
- ☞ An acceptable Bureau of Criminal Identification and Investigation (BCI&I) report/FBI background check and drug screening are required to enter the nursing program. The BCI&I check, FBI background check, and drug screening will be done at the college at the beginning of the nursing program and the cost is included in the lab fees of the first nursing course. Upon graduation from the nursing program, students will be eligible to take the licensing examination administered by the Ohio Board of Nursing. The Board will not approve applications for persons who have been convicted of the following crimes: aggravated murder, murder, voluntary manslaughter, felonious assault, kidnapping, rape, sexual battery, gross sexual imposition, aggravated assault, aggravated robbery & aggravated burglary.
- ☞ It is the student's responsibility to notify the Student Records Office of any address or phone number changes. Failure to keep contact information updated could prevent the student from receiving important communication about acceptance to the program, which will result in the student's name being removed from the Associate Degree Nursing Advanced Standing Pool.

These pre-requisites are reviewed on an annual basis and may be revised for the next academic year.

How are students accepted with advanced standing into the Associate Degree Nursing program?

Admission is based on meeting the established criteria, available space in the program, and satisfactory completion of the Admission with Advanced Standing procedure.

Students will be considered for admission with advanced standing according to the following priority list:

- Category 1 First priority – previously successful NC State ADN student. This includes students who, at the time of withdraw, had a passing grade in current nursing course.
- Category 2 Second priority – transfer student in good standing (successful at previous college).
- Category 3 Third priority – previous unsuccessful NC State ADN student. This includes students who, at the time of withdraw, had a failing grade in current nursing course.
- Category 4 Fourth Priority – transfer student not in good standing (unsuccessful at previous college).

Ranking of students from within one category will be based on total accumulated points obtained from the Criteria for Advanced Standing to the ADN Program, 1 through 7. If the total accumulated points are equal, the earlier date of application will be given priority consideration.

Applications will be held for one year. If entrance into the program has not occurred, and the student wishes to be considered for future openings, a new application must be completed.

This procedure is reviewed on an annual basis and may be revised for the next academic year.

What else should I know about the Associate Degree Nursing Program?

Physical Examination

Students accepted to the nursing program will receive physical examination materials from the nursing department at the college. Each student must pass a complete physical with verification of immunizations/immunities and an acceptable Bureau of Criminal Identification (BCI&I) report/FBI background check and drug screening before being permitted to enter clinical areas.

Uniforms

Nursing students are required to purchase uniforms. Purchasing information will be sent along with the physical exam materials. Uniform costs are estimated to be approximately \$150, or higher, depending on the number of uniforms purchased.

Cardiopulmonary Resuscitation Certification (CPR)

All nursing students must have a current valid certificate in Healthcare Provider CPR before they will be allowed to start their clinical classes. This certificate can be obtained through the American Heart Association or Red Cross. Successful completion of HLST1010 CPR/First Aid will also fill this requirement. Current certification must be maintained throughout the program.

Academic Standards

Beginning Fall semester, 2015, pre-nursing and nursing students must earn a minimum grade of 77% in each science course (BIOL 1101, BIOL 2751, BIOL 2752, BIOL 1550, and CHEM 1030) in order to meet prerequisite and graduation requirements. Students earning less than 77% may elect to repeat the course. Nursing students receiving less than 77% in a science course cannot progress to the next semester in their nursing sequence.

In addition, a grade of 77% or above will be required in all courses taken Fall semester, 2015, or later that are part of the Associate Degree Nursing curriculum to progress in the nursing program and meet prerequisite and graduation requirements. If a student is unsuccessful and desires re-entering the program at a later date either as an advanced standing student or starting the nursing program from the beginning, the student must meet the admission procedures that are current at that time.

Liability Insurance

Liability insurance will be in effect the entire time the student is enrolled. This cost of insurance is included in fees for each semester nursing course.

_____ Radiological Sciences _____ Registered Nursing
_____ Respiratory Care

Date: _____ Student ID: _____

Name: _____
(First) (Middle) (Last)

Street Address: _____

City: _____ State: _____ Zip: _____

Phone: (Hm) _____ (Cell) _____

Check one of the following:

_____ LPN Articulation _____ Advanced Standing _____ Transfer
_____ Proficiency _____ Re-Admit

Semester you wish to enter: Year _____ FALL SUMMER SPRING

PROCEDURE

Complete this form at least ten (10) weeks before the beginning of the semester in which you wish to enroll. Academic records will be sent to the appropriate Health Sciences department for review and evaluation. You will be notified of the decision by the department concerning your entry into the program.

**If, after one year from the above date, you have not been re-admitted to the Health Sciences program checked above, you will have to complete a new Health Sciences Re-Entry Form.

Signature

Completed forms can be emailed to Amy Burns (aburns@ncstatecollege.edu) or Aubrey Place (aplace@ncstatecollege.edu). They can also be dropped off at the Health Sciences Center – Room 201.

FOR LPN ARTICULATION: Completed forms should be emailed to Brandon Stover (bstover@ncstatecollege.edu) or dropped off at the Health Sciences Center – Room 201.
