IV. Examination Policy:

Personal integrity (i.e. doing one's own work) in the submitted assignments is the standard.

V. Class Attendance and Homework Make-Up Policy:

Attendance

There are no face-to-face attendance requirements. It is anticipated that students will be logging into the course frequently (many times each week).

Your attendance will be marked each week as

- fully attended (submitting all assignments for the module);
- partially attended (submitting some portion of assignments for the module); or
- absent (not submitting any assignments for a module).

Homework/Participation Requirements

Students must participate within the first week of the term in order to avoid being dropped for non- participation. This is a college-wide policy. Students must also participate in and achieve at least 67% success by the point of mid-term grade reporting to again avoid being dropped from the course for non- participation (another college-wide policy).

Homework can only be made up in extenuating circumstances that are approved in advance by the instructor. Assignments submitted late without instructor approval may not be graded.

If an assignment is approved to be submitted and graded late, a 20% minimum penalty will be applied.

There are no extensions past the last day of the term.

VI. Classroom Expectations:

If you have concerns of any kind, it is your responsibility to come to me about those concerns. It is my responsibility to be attentive to your needs whenever possible. Clear and respectful communication is an expectation of both teachers and students.

VII. Artificial Intelligence (AI) Policy:

Artificial intelligence (AI) can be a valuable tool for academic purposes. AI may assist with generating ideas, checking grammar, and improving writing skills and other class-related tasks, but it should not be relied upon solely. Students are expected to demonstrate independent thinking and analysis and use AI to supplement their work. AI does not replace critical thinking and relying solely on AI to complete assignments undermines your learning.

Course Number: BUSM-2285
Semester / Session: Spring 2026 / Full-Term

Course Title: Seminar
Start / End Date: 01/12/2026 thru 05/08/2026

Any work submitted must be the student's own, and using AI to generate entire assignments or portions of assignments is strictly prohibited and will result in academic consequences. To promote transparency and accountability, students must document their use of AI in any assignments, including the prompts or instructions they provided to the AI and any additional notes about the AI's output or their analysis. AI is not always accurate and may produce outdated, misleading, biased, or entirely incorrect information. Always verify any AI-generated content with credible academic sources.

Plagiarism, including using AI to generate assignments, not only cheats the student out of learning, but is considered a form of academic misconduct and will result in disciplinary action.
