### Generative Artificial Intelligence (AI)

Generative artificial intelligence tools may be used **as a writing support tool**, not as a substitute for your own work. You may use AI to help edit, revise, or improve clarity in writing that **you have already written**, such as checking grammar, improving sentence flow, or formatting citations in APA style.

However, AI tools **may not be used to generate original assignments content, ideas, arguments, summaries, paraphrases, sources, or quotations**. All analysis, interpretation, and written work must originate from you. Using AI to create the substance of an assignment is considered academic misconduct.

When used ethically, AI functions like a digital writing assistant, not an author. If you are unsure whether a particular use is appropriate, ask before submitting your work.
